**YOUR SAUDI BATTERY
EXPERT**

POWER THAT KEEPS YOUR BUSINESS MOVING

WHO WE ARE JEDDAH-BASED BUSINESS & GOVERNMENT FOCUS 15+ GLOBAL BRAND PARTNERS FULL-SERVICE: SUPPLY, SOURCING & CUSTOM ASSEMBLY

BATTERIES.SA IS A JEDDAH-BASED BATTERY AND ENERGY SOLUTIONS PROVIDER DEDICATED TO THE BUSINESS SECTOR. WE SUPPLY, SOURCE, AND ASSEMBLE BATTERIES FOR COMPANIES, GOVERNMENT ENTITIES, AND ORGANIZATIONS ACROSS SAUDI ARABIA

— from medical facilities and data centers to fleets, industrial equipment, and emergency systems.

What began as a focused supplier of essential battery types has grown into a full-service energy partner. Today, our catalog spans sealed lead-acid batteries for critical backup power, SLI batteries for engines and heavy equipment, industrial alkaline cells for tools and sensors, and specialty batteries for solar, medical, and deep-cycle applications — alongside a custom pack assembly service for

hard-to-find configurations.

By partnering with leading global brands and combining that with fast, local, personal service, we make sure your operations run without interruption — whatever the application, and whatever the sector.

Being based in Jeddah is a deliberate choice. It keeps us close to the clients we serve most, allows us to move quickly on urgent orders, and lets us build the kind of ongoing relationships that come from being a known, local partner rather than a distant supplier. At the same time, our brand partnerships give clients access to internationally proven products, not just what happens to be available locally.

Every relationship starts the same way:

understanding what the client's equipment actually needs, matching that to the right battery technology and brand, and making the ordering and delivery process as simple as possible from that point forward.

WHAT WE DO

From the smallest precision electronic cell to the batteries that power trucks and heavy machinery, we cover the full range our clients need. Our work spans four main areas: sealed lead-acid batteries for critical backup systems, SLI batteries for engines and equipment, industrial alkaline batteries for tools and sensors, and specialty batteries for solar, medical, and deep-cycle applications.

We also rebuild and assemble custom battery packs that are difficult to find elsewhere, using global-grade cells to match original performance.

Every order is handled by a team that understands the difference between a starter battery and a deep-cycle one — and takes the time to match the

application leads to premature failure, unnecessary downtime, and repeat costs that a correct match avoids entirely.

Orders are placed directly, by WhatsApp, phone, or email, and fulfilled quickly from our base in Jeddah. There is no lengthy procurement process to navigate — clients describe what they need, our team confirms the right specification, and delivery follows without delay. Beyond individual orders, we also support ongoing fleet and facility relationships, where predictable, repeat supply matters as much as the product itself. For these clients, we function less like a one-time vendor and more like an extension of their

right battery to your exact application, not just the closest one in stock. This matters more than it might seem: the wrong battery technology in the wrong

maintenance and operations planning .

MAKING YOUR BUSINESS EASIER

At Batteries.sa, we strive to be the partner you rely on for integrated energy and battery solutions

We focus on serving companies and government entities across a wide range of sectors — from medical facilities to emergency systems — ensuring your operations run smoothly and without interruption. For many of our clients, a battery failure isn't a minor inconvenience — it's a halted production line, a vehicle out of service, or a backup system that isn't there when it's needed. Our mission is built around removing

that risk before it becomes a problem.

That means being easy to reach, fast to respond, and precise in what we recommend — so choosing and receiving the right battery is never the hard part of your day. It also means staying honest: where a lower-cost option is genuinely sufficient, we say so; where a higher-grade battery saves money over its lifetime, we explain why.

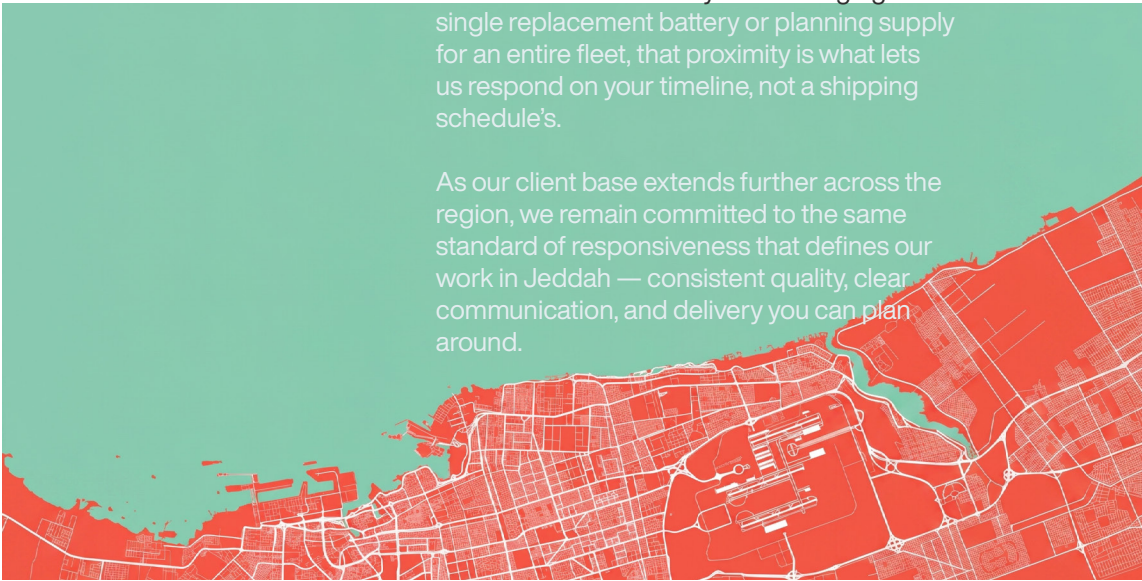

From Jeddah, We Reach You Wherever You Are

We are based in the heart of Jeddah to stay close to you — combining the quality of the global products we supply with the speed of local service you deserve, to meet all your

needs with precision and efficiency.

Our location isn't incidental — it's central to how we operate. Being close to the clients we serve most means shorter lead times, easier coordination for urgent or large orders, and a working relationship built on familiarity rather than distance. Whether you're arranging a single replacement battery or planning supply for an entire fleet, that proximity is what lets us respond on your timeline, not a shipping schedule's.

As our client base extends further across the region, we remain committed to the same standard of responsiveness that defines our work in Jeddah — consistent quality, clear communication, and delivery you can plan around.

THE MOST TRUSTED BATTERY PARTNER IN THE REGION

Our Vision: To be the most trusted battery and energy partner for businesses across Saudi Arabia and the region — recognized for the quality of the brands we carry, the speed of our service, and the technical expertise behind every order.

We measure that trust in concrete terms: clients who return without needing to compare alternatives, referrals from one department or company to another, and long-term supply relationships that outlast any single order. Growth, for us,

is not just about adding new clients — it's about becoming the default choice for the ones we already serve, and earning that same position with every new sector we enter.

Looking Ahead

Work Culture & Core Values

Our team is built around one idea: your uptime is our responsibility. That shapes how we hire, how we communicate, and how we treat every order — from a single golf-cart battery to a full fleet contract.

We keep specialists on staff who know the technical difference between battery types and applications, so recommendations are based on your actual use case — not just what's in stock. That expertise is treated as a core part of the service, not an add-on: before any order is confirmed, our team makes sure the battery being supplied is genuinely the right fit for the equipment, environment, and usage pattern it's going into.

Communication stays direct and simple: WhatsApp, phone, or email, with real answers from people who understand batteries. We avoid layers of process that slow down a simple request, because for many of our clients, a fast, correct answer is worth more than an elaborate one.

Being based in Jeddah lets us combine the reliability of globally recognized brands with the

responsiveness of a local team — fast delivery, and a level of care that treats every order, large or small, the same way. A single replacement battery for a medical device gets the same attention as a multi-unit fleet order.

Internally, that culture is reinforced through continuous product knowledge — staying current on new brand releases, technology shifts (such as the move toward AGM and EFB batteries in modern vehicles), and application-specific requirements across the sectors we serve. It's this combination of technical depth and straightforward service that defines how we work, day to day.

RELIABILITY — Solutions that keep critical systems running without interruption.

TECHNICAL EXPERTISE — Specialists who help you choose the right battery for your exact application.

What We Stand For

Zero Compromise Only globally recognized, proven brands make it onto our shelves. We don't stock a product simply because it's cheap or available — every brand we carry has to meet a standard of consistency our clients can depend on, order after order.

What We Stand For

Every Sector Covered From hospitals and data centers to fleets, marine, and powersport — one supplier, every application. Whatever the equipment, whatever the industry, our range and our technical knowledge are built to cover it, so clients don't need multiple suppliers for different parts of their operation.

What We Stand For

Growing With You

Where We Stand Today

Growing With Saudi Arabia's Businesses

13+ Brands	9 Categories	100% Local Service	Jeddah
			HQ

What started as a focused battery supplier has grown into a full-service energy partner — covering everything from UPS backup to heavy-duty fleet batteries, with the technical depth to support hard-to-find and custom applications. That growth wasn't accidental: it followed directly from what our clients kept asking for, one sector at a time.

As we worked with more hospitals, we expanded our high-rate UPS and general-purpose SLA range. As fleet clients grew, so did our heavy-duty and auto battery selection. Each new category was added because a real client need justified it, which is why our current range reflects genuine market demand rather than a generic catalog built for its own sake.

Growing With You

As our client base has expanded across sectors, so has our brand roster — chosen deliberately, not just added for volume, to keep every recommendation backed by real quality. We evaluate new brands the same way we evaluate every order: by asking whether it genuinely improves what we can offer a client, not simply whether it adds another logo to the page.

Looking forward, our focus remains the same as it was on day one — stay close to our clients, understand what they actually need, and make sure the right power solution is always one message away.

Where We Stand Today

WHY CHOOSE US

Reasons to Partner With Us

Selected global options: major brands (Yuasa, CSB, Kung Long, and more) chosen as the strongest in their category, not just to fill a catalog.

Local service from Jeddah: based locally for shorter lead times and fast response to urgent requests.

Easy communication and ordering:

place your order directly by WhatsApp or official email — no complicated procurement process.

Specialized technical support: we help you choose the right battery for your application, so you're never paying for more than you need.

SLA Batteries Sealed lead-acid batteries for security systems, power backup, UPS, and mobility scooters/wheelchairs. Available in high-rate UPS, general-purpose, deep-cycle, and gel formats to match the exact standby or cycling demands of your system.

SLI Batteries Engine & equipment batteries for trucks, heavy equipment, cars, golf carts, and boats. Selected for cranking power, reserve capacity, and durability across flooded, EFB, and AGM technologies.

Industrial Alkaline For lighting devices, control equipment, and smoke/sensor detectors. Sourced from the leading American and European brands for consistent performance in demanding industrial environments.

Specialty Batteries Solar energy solutions, medical devices, and deep-cycle applications, including custom-assembled packs for hard-to-find configurations using global-grade cells.

A World of Energy Solutions in Your Hands

SLA Batteries + PLC/Industrial Batteries

Energy That Never Stops. From the smallest precision electronic batteries to power for engines and heavy equipment, Batteries.sa provides integrated solutions built around your business continuity.

SLA (Sealed Lead-Acid) Batteries

Also known as VRLA batteries, SLA batteries power critical systems that cannot afford downtime. Available in General Purpose, Deep Cycle, and Gel types.

Type	Brand / Origin	Applications
High-Rate UPS	CSB (Vietnam), Yuasa (Japan)	Hospitals, data centers, large UPS systems
General Purpose	CSB (Vietnam), Yuasa (Japan)	Fire & security systems, emergency lighting
Deep Cycle	CSB (Vietnam), Yuasa (Japan)	Golf carts, electric wheelchairs
Gel (GEL)	Kung Long (Vietnam)	Solar systems, off-grid energy storage

HARD-TO-FIND BATTERIES FOR CRANES, ASSEMBLY LINES, AND EMERGENCY SYSTEMS. WE SUPPLY SAFT (FRANCE) LITHIUM CELLS,

PLUS COMPATIBLE ALTERNATIVES TO TOSHIBA AND SIEMENS, FOR CONTROL UNITS, PRODUCTION LINES, AND AUTOMATION SYSTEMS.

Industrial Alkaline + Custom

Industrial Alkaline Batteries

The optimal solution for equipment demanding high reliability in tough environments — test/measurement devices, barcode scanners, industrial scales, and remote sensors.

We supply the top three global brands.

Size	Philips	Energizer	Duracell
AA	LR6P4B	EN91	PC1500/PX1500
AAA	LR03P4B	EN92	PC2400/PX1400
C	LR14P2B	EN93	PC1400/PX1400
D	LR20P2B	EN95	PC1300/PX1300
9V	6LF22P1B	EN22	PC1604/PX1604

Custom Battery Pack Assembly

We rebuild and assemble hard-to-find custom battery packs using global-grade cells (such as Saft) to guarantee performance matching the original —

lithium, nickel, silver-oxide, and alkaline cells.

Auto Batteries + Heavy Duty (Trucks & Equipment)

Auto Batteries

Advanced, fleet-dedicated power for vehicles serving commercial, industrial, and emergency-response sectors.
